### Cadastre NSW

#### Adrian White – Program Manager Cadastre 2020 – LPI

NSW does not have a 'single' digital representation of the cadastre used ubiquitously across Government and industry. Instead, many organisations maintain separate cadastral datasets which represent the same core information but vary in their spatial positioning, attribution and the type of features displayed. Consequently, NSW is hindered due to duplication of effort and misalignment when spatial information from multiple sources is combined.

To address this, a Single Land Cadastre for NSW workshop was held on 1 July 2015. The participants, representing a wide range of stakeholders including ISNSW, agreed on the vision for 'Cadastre NSW' and a strategic roadmap to achieve that vision. The workshop's summary of outcomes report is now publically available. This presentation will provide an update of the Cadastre NSW initiative to date and the immediate next steps being undertaken.
